

Biography

Paolo Baggia is currently Director of International Standards of Loquendo and actively involved in W3C and the VoiceXML Forum, where he is a member of the Board of Directors. Formerly, he lead the VoiceXML browser development for Loquendo's VoxNauta platform.

In 1989, he joined CSELT, Telecom Italia's R&D lab, and was involved in several research activities, including natural language, speech parsing, spoken dialog design, and language modeling. In 1999, he took part in a large-scale speech application: the automation of Trenitalia railway company's call centers. He holds a degree in computer science from the Università di Torino.
