Waterloo, ON, July 11, 2008 – Intelligent Mechatronic Systems Inc. (IMS), a leader in making cars smarter and safer, is proud to announce their recent partnership with Loquendo. IMS will be using Loquendo's text-to-speech (TTS) and automatic speech recognition (ASR) technologies in its soon-to-be released iLANE product.

iLANE is a hands-free and eyes-free, voice-based email solution for in-vehicle use. Customers can hear and manage email and SMS messages, make and receive phone calls, access their calendar, and hear on-demand content like news, weather, sports and traffic. Learn more about iLANE at www.ilane.com.

Loquendo's natural sounding speech technologies and emotive voices greatly compliment IMS' current product portfolio. As such, IMS has agreed to resell Loquendo's advanced embedded TTS and ASR products in North America. Focusing on the automotive and wireless markets, IMS is able to offer a turnkey voice-based software solution to all customers.
